

Vaishnavi Mishra

Kanpur, India | connect.with.vaishnavimishra@gmail.com | LinkedIn | GitHub | LeetCode

CAREER OBJECTIVE

Computer science undergraduate with strong foundations in software development, data structures, and problem solving, with hands-on experience in cloud computing.

EDUCATION

Pranveer Singh Institute of Technology

B.Tech in Computer Science and Engineering | CGPA: 8.59/10 (Upto 5th Sem)

Kanpur, India

Oct 2023 – Oct 2027

Mercy Memorial School

Class XII (ISC): 94.25% | Class X (ICSE): 94.4%

Kanpur, India

2020 – 2022

SKILLS

Languages	Java, Python, JavaScript, TypeScript
Frameworks	React.js, Node.js, Express.js
Databases	MySQL, MongoDB, PostgreSQL
DevOps	Docker, GitHub Actions (CI/CD), Cloud Logging
Cloud	Google Cloud Platform (GCP), Cloud Run, Kubernetes, Vertex AI, Compute Engine, VPC, IAM
Tools	Git, GitHub, Render, Vercel
Coursework	Data Structure and Algorithms, Object-Oriented Programming, Operating Systems, DBMS

PROJECTS

CORTEX | Python, OR-Tools CP-SAT, XGBoost, FastAPI, React.js, D3.js, Redis, PostgreSQL

Apr 2026 – Present

- Contributing to backend development of a real-time railway scheduling system in a 5-member team; implementing a modified Dijkstra algorithm with dynamic constraints (capacity, priority) for efficient routing.
- Designing the Time-Expanded Graph (TEG) engine to model spatio-temporal train movements for scalable, conflict-aware scheduling.
- Developing a CP-SAT-based optimization module to generate priority-weighted train schedules under real-time constraints.
- Building real-time data ingestion pipelines and REST APIs with WebSocket services to stream live scheduling updates.

Muse.AI | React.js, Express.js, Neon PostgreSQL, Clerk, TailwindCSS, Gemini AI

Sep 2025 – Nov 2025 | Live | GitHub

- Built an AI-powered SaaS platform that provides a unified workflow for generating articles, images, and resume optimization, with AI-driven resume analysis for ATS compatibility and a production-ready architecture supporting real-world deployment.
- Led end-to-end development of an AI-powered SaaS platform, driving key architectural decisions and coordinating a 4-member team across backend and frontend.
- Built core backend modules including user routes, controllers, and AI pipelines enabling article generation, image generation, and resume review using Gemini APIs.
- Implemented file upload pipeline using Multer + Cloudinary and developed REST APIs with validation and error handling for consistent frontend integration.
- Managed deployment and environment configuration (Vercel to Render migration), ensuring stable production performance.

SkySense | React.js, TailwindCSS, Express.js, OpenWeather API, Unsplash API

Aug 2025 | Live | GitHub

- Built a responsive weather application delivering real-time global data, with initial API response and UI rendering under 5 seconds.
- Implemented dynamic UI with condition-based backgrounds, Celsius/Fahrenheit toggle, and multi-day forecasts.
- Designed optimized Express.js API routes to minimize redundant OpenWeather requests and improve backend efficiency.
- Debugged and resolved integration issues including CORS configuration and API failure scenarios to ensure stable frontend-backend communication.

CERTIFICATIONS

Google Cloud Skill Boost (2025)

ACHIEVEMENTS

- Achieved LeetCode Knight Badge with a peak Contest Rating of 1878 (Top 4% globally), demonstrating consistent excellence in competitive programming.
- Solved 1000+ problems across LeetCode, Codeforces, and GeeksforGeeks; secured Rank 621 in LeetCode Biweekly Contest 170, solving all problems within contest time.
- Ranked in the Top 1% in a college hackathon among 2000+ participants.
- Completed 60+ Google Cloud Skill Badges across Kubernetes, Cloud Run, Compute Engine, and Vertex AI.
